## CLASSIFICATIONS

MTM is implementing a “**ready-plug-fleet**” concept which means that at any given moment we can safely and uninterruptedly increase managed fleet capacity by a minimum of **15%** without further expansion. Each fleet is headed by a Fleet Manager and Technical Superintendents, each looking after 4-5 vessels, while there is an exclusive support team for each fleet.

Dedicated Marine Team headed by a Senior Manager with **vast experience and history** working with Oil Majors. Each Marine Superintendent manages 8 ships with main focus on smooth cargo operations **from start to finish** with respect to tank & hatch cleaning, cargo loading, transit & discharge and cargo residues management. They ensure that right attention is given to commercial operations, vessel safety management and 3<sup>rd</sup> party inspections such as **SIRE, CDI and PSC**.
